CITY OF ALGONA

SUBMITTAL REQUIREMENTS AND REVIEW PROCESS FOR Final Short Plat

A. APPLICABILITY

Final Short Plat

A Short Plat is the City's submittal process to permit subdivisions of nine lots or less. The requirements and procedures for all Short Plats proposed with a development project is governed by Chapter 19.16 AMC.

B. MINIMUM SUBMITTAL REQUIREMENTS

The following items are the minimum initial submittal requirements for processing a Short Plat application.

- ☐ Completed and signed application form and associated fee
- ☐ A title report dated within 30 days of submittal date
- ☐ A copy of the final plans, including:
 1. Stamp and signature of a Washington State-licensed surveyor;
 2. North arrow, scale and date;
 3. Name and address of the owner(s) of the property;
 4. Parcel numbers for all affected parcels;
 5. An original legal description of all existing parcels contained in the short plat;
 6. Proposed new legal descriptions for the modified lots/parcels;
 7. All dimensions and bearings of the exterior boundaries of the short plat and proposed lots with ties to at least two known monuments. If necessary, an alternate system may be used with prior approval of the city of Algona engineering department;
 8. Names of adjacent subdivisions adjoining property owners;
 9. All section lines within and adjacent to the short plat;
 10. The existing and, if applicable, proposed future method of sewage disposal for each affected lot. Where any lot affected by a proposed short plat is served or is likely to be served in the future by an on-site sewage disposal system, a percolation test for each such lot may be required by the city engineer when the city engineer finds that the proposed short plat could adversely affect the ability of such lot to be adequately served by such on-site system;
 11. Declaration blocks shall be provided for the lot owner(s), surveyor, approving governmental agencies and recording certification in a manner as prescribed by the city planner;
 12. Existing lots, including their layout, exterior dimensions, size and lot numbers. The line(s)

- to be adjusted should be dashed and marked as such ("existing line");
13. Revised lots, including their layout, exterior dimensions, size, and lot numbers. The adjusted line(s) should be solid and noted as such ("revised line");
 14. The total area of the short plat and rebar and caps set at new lot/boundary corners;
 15. Location of all existing structures and their distances to the adjusted line(s). If these structures are to be removed or moved, please note them as such;
 16. Main building setbacks required on each revised lot;
 17. Location of all existing fences, walls and other improvements in close proximity to the adjusted line(s), including encroachments, and their distances from the adjusted line(s);
 18. All existing and proposed easements within and adjacent to the short plat. Easements should be labeled (i.e., "Proposed private access and public utility easement to benefit Lot 1") and existing easements should also include their recording numbers;
 19. Location of private utility lines (sewer, water, power, gas, etc.) serving existing structures on the property if those existing structures are to remain;
 20. Existing contour lines of the site, as well as proposed new contours, if the proposal involved re-grading, are required. Contours shall be at a minimum of five-foot intervals;
 21. Location of any wetland or surface water body (stream, pond, lake) on or within three hundred feet of property;
 22. Location of any other critical area(s) on the site (geologically hazardous areas, fish and/or wildlife habitat, flood zones or aquifer recharge areas);
 23. The location and dimensions of any existing roads, drainfields, easements, or rights-of-way existing within any affected lot and other important features adjacent to the proposed short plat;
 24. The area and dimensions of each lot following the proposed short plat. The square footage computation of each proposed lot or parcel shall be sufficiently accurate to show that each such lot or parcel contains at least sufficient footage to meet minimum zoning requirements;
 25. When a short plat is designed with lot sizes large enough to be capable of further subdivision, the applicant will be required to submit a future development plan depicting that adequate provisions have been made in the proposed short plat for the future needs for access, utilities, drainage, sewerage, transportation, and compliance with environmental regulations, the comprehensive plan of the city and other criteria as set forth in other ordinances of the city;
 26. Roads not dedicated to the public must be clearly marked as such on the face of the plat. Any dedication, donation or grant, as shown on the face of the plat, shall be considered to all intents and purposes as a quit claim deed to the grantee or grantees for his, her or their use for the purpose intended by the donors or grantors as aforesaid; and
 27. A space for approval by the administrator.
 28. A note that reads: *THIS SURVEY COMPLIES WITH ALL THE STANDARDS AND GUIDELINES OF THE "THE SURVEY RECORDING ACT," CHAPTER 58.09 RCW AND CHAPTER 332-130 WAC.*

C. FINAL SHORT PLAT SUBMITTAL INSTRUCTIONS AND REVIEW PROCESS

1. A final short plat application is submitted by hand, mail, or email to City Hall. Email submittals are accepted at juliek@algonawa.gov.
2. The City will administratively review the application against the preliminary short plat and will issue a final approval of the short plat.
3. Once the final approval is issued, three paper copies of full-size plans of the Final Short Plat must be signed by all representatives with their signatures notarized. Once all copies have been signed/notarized they must be submitted to the City for signatures. Following that, the documents must be taken to the King County Department of Assessments for the Assessor's and Deputy Assessor's signatures then on to the Recorder's Office to be recorded. Once recorded, one of the copies must be submitted to the City.
